PRAJWAL NOEL PAIS

9482251882 prajwalnoel2005@gmail.com prajwalpais prajwalpais-08 prajwalpais.vercel.app

Professional Summary

Computer Science undergraduate graduating in 2027 with hands-on experience building backend and full-stack applications. Developed real-time collaborative software using Go and WebSockets, transactional database applications using SQL, and an automated GST billing system. Experienced in AI-driven application development, with a focus on reliable software, data consistency, and practical problem-solving.

Education

St Joseph Engineering College — Expected 2027
Computer Science and Engineering — *Mangalore, Karnataka*

Janatha PU College — 2020 – 2023
Pre-University Course (PUC) — *Kundapur, Karnataka*

Technical Skills

Languages: C, C#, Java, Python, JavaScript, SQL
Frontend: React.js, HTML, CSS
Backend & Frameworks: Node.js, Express.js, Go
Databases: MySQL, MongoDB
Core CS: Object-Oriented Programming, Data Structures & Algorithms
Tools: Git, GitHub, VS Code, Render, Vercel

Projects

Real-Time Collaborative Canvas & Messenger | *Go, React.js, WebSockets* — GitHub | Live Demo

- Designed a Go backend with concurrent WebSocket connections to synchronize canvas state and chat messages across multiple simultaneous users in real time.
- Built a collaborative whiteboard supporting simultaneous multi-user drawing, editing, and live chat within one shared canvas.

SmartInventory – Inventory Management System | *C#, .NET Windows Forms, SQL Server* — GitHub

- Built a desktop POS and inventory system (products, customers, sales, purchases, sales history) – a Windows desktop application
- Implemented transaction-based sales/purchases with **automatic stock synchronization** and low-stock alerts using SQL Server + Microsoft.Data.SqlClient.

GST Billing App | *React, Express.js, SQLite* — GitHub | Live Demo

- Built a GST-compliant invoicing engine with automatic **CGST/SGST/IGST** tax calculation for intra-state and inter-state transactions – the same tax-logic domain as production tax/accounting software.
- Designed a relational schema with **atomic transactional writes** (parameterized SQL) so an invoice and its line items always persist together, preventing partial/corrupt invoice records.

Experience

BharatCares – AICTE & IBM SkillsBuild — Jun 2026 – Jul 2026
AI Automation and Intelligent Solutions Intern — *Live Demo*

- Built and deployed **ForgeAI**, a multi-agent AI web application builder using a DAG-based pipeline that automates planning, research, code generation, and deployment.
- Applied prompt engineering and agentic-AI design principles from a 6-week AICTE/IBM SkillsBuild program covering workflow orchestration and end-to-end AI system integration.

Achievements

- Secured a **Top 5 Finalist** position **among 75 teams** in the AYUSH HABBA Hackathon for developing the **Ayush Health Wellness** project.
